

# KLA COMMUNITY DASHBOARD

**Make your work count. *Storytelling for the Win.***

**Report Progress. Secure Buy-In. Empower Community Action.**

**Turn your data into stories and your stories into impact.** This online storytelling platform was developed specifically for local governments to more effectively share their climate, sustainability and resilience solutions with their communities.

## TRUSTED BY LOCAL GOVERNMENTS

"The Dashboard that KLA has developed for us is a really great landing page for all things sustainability in San Antonio. The information you're looking for is probably there, and it's better than just having to dig through files to find information to share with people. And just from an efficiency perspective having that one stop shop Dashboard is a huge asset."

**Doug Melnick**, Chief Sustainability Officer, City of San Antonio

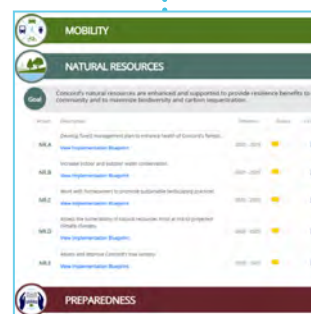

"Working with Kim and her team has been so easy. They are experts in both Climate Action Planning and web design. The matchup is perfect when it comes to the development of our dashboard."

**Crystal Najera**, Climate Action Administrator, Encinitas, CA

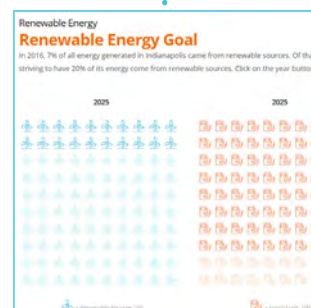

## ANNUAL REPORT

Easy "Print Button" translates into a professionally designed report

## ACTION PLAN IMPLEMENTATION TABLE

Highlight all plan elements and demonstrate progress

## DATA VISUALIZATION

Go beyond graphs with fun and creative data visualizations

Actively engage community members with **interactive educational tools**.

Translate complicated language into **user-friendly visuals**.

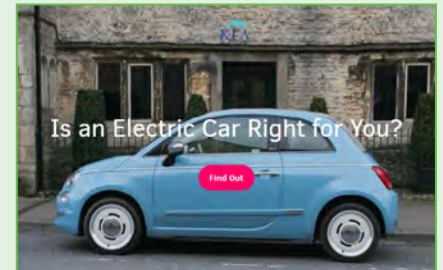

...and **MORE** with these **additional dashboard features!**
