

# City of Northampton, MA

## Climate Resilience & Regeneration Plan

### Project Summary

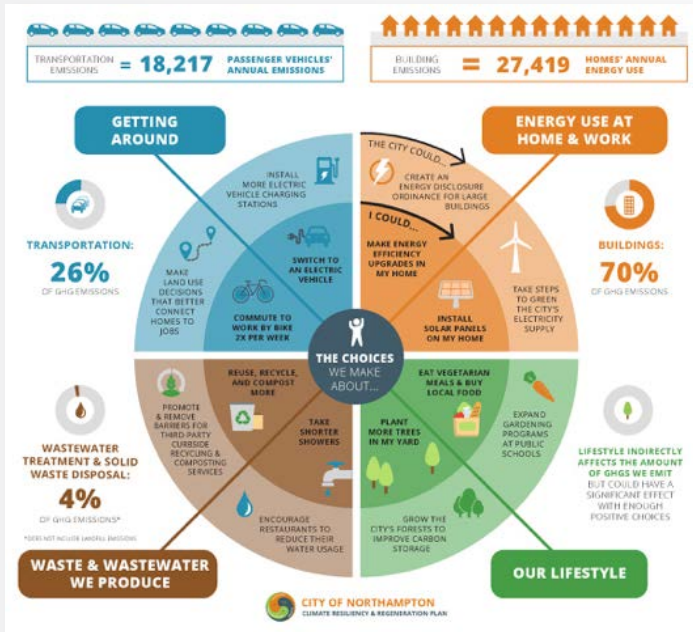

KLA was part of a team working with the City of Northampton on the development of their Climate Resilience & Regeneration Plan. KLA led the stakeholder and public engagement process, GHG inventory, the integration of the existing comprehensive bike/walk plans leveraging the STAR Framework, and all of the City's communications and design work. KLA also collaborated on the MVP support and the development of a climate resilience and regeneration framework.

Timeline: March 2018 - August 2019

### Project Highlight

For Northampton, KLA developed an infographic that helped citizens think about their role in addressing climate change.

Northampton Infographic

### Activities & Outcomes

- Design of an equity-driven climate planning process
- Delivery of the Massachusetts Vulnerability Preparedness (MVP) process
- Updates to a GPC compliant GHG inventory
- Development and implementation of a public engagement strategy focused on building capacity to support an ongoing, inclusive public dialogue on climate change
- Creation of an online version of the final Resilience & Regeneration Plan
- Design of a Climate Resilience & Regeneration Framework focused on ensuring that the priorities identified through the planning process could easily be applied to future plans and projects
